DETAILED ACTION

This Office Action is in response to Applicants' amendments filed on January 12, 2005.

Claims 1-6 and 9 are pending.

Withdrawal of Rejections from Previous Office Action

- The rejection of claims 1-4, 6 and 9 under 35 USC 102 over Laipply is withdrawn in view of Applicants' amendment reciting particular chemical reactants.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laipply in view of Joshi.

Laipply discloses an applicator wipe for fluids. The wipe is a pad (11) of absorbent material, which may be natural or synthetic. Gauze material (spongy) may be suitable. The pad is saturated with a liquid chemical reactant, such as substances used for sterilizing or cleaning. The pad is packaged in a pack formed of metal foil. The package is impervious to external contaminants and impermeable to the fluid contained therein. The package contains a temporary

Art Unit: 1743

seal formed around the perimeter of the device. Flanges facilitate the opening of the package without tearing the pad inside. Laipply also teaches that the package material may be of the type to allow the absorbent pad to be directly attached to it.

Laipply differs from the instantly claimed invention in that there is no teaching of the chemical being a catalyst, primer, activator, adhesion promotor or polymerization monomer.

Joshi teaches a delivery system for cleaning agents. The delivery system includes a device for retaining the substances and a means for releasing the substance. Joshi teaches organic tin salt solutions as antiseptic agents which may be used in the delivery system. It would have been obvious to one of ordinary skill in the art to use organo-tin compounds in the delivery system of Laipply because the system provides an easy and convenient manner for delivering anti-septic agents which allows the substance to be delivered without the user touching the substance and further contaminating the surface where the substance is being delivered.

With respect to the anti-septic agent being labeled as a catalyst, primer, activator, adhesion promotor or polymerization monomer, the anti-septic agents of Joshi are those claimed by Applicants. Thus, it is the position of the examiner that the agents may be used in the claimed capacities.

Response to Arguments

4. Applicant's arguments with respect to the instant claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1743

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
